

ANIL KUMAR AKURATHI

Power BI Developer — Data Analyst

+91 9160098396 | anilkumarakurathi998@gmail.com | linkedin.com/in/anil-kumar-akurathi-1b4648191

SUMMARY

Power BI Developer and Data Analyst with 5+ years of experience delivering Business Intelligence, data analytics, and reporting solutions in the Banking and Financial Services domain. Expertise in Power BI, SQL, Microsoft Fabric, Azure Data Factory (ADF), Snowflake, Alteryx, and Azure Synapse Analytics for ETL development, data integration, data modeling, and dashboard development. Proficient in DAX, Power Query, Star Schema, Semantic Models, KPI reporting, Row-Level Security (RLS), and Power BI Service. Experienced in building scalable analytics solutions, optimizing SQL queries, automating data transformation, and collaborating with cross-functional Agile teams to deliver business insights.

TECHNICAL SKILLS

BI & Analytics: Power BI Desktop, Power BI Service, DAX, Power Query, Dashboard Development, Report Development, Data Visualization, Data Analysis

Data Engineering: Microsoft Fabric, Azure Data Factory (ADF), Azure Synapse Analytics, ETL Pipelines, Data Transformation, OneLake, Lakehouse

Databases: SQL, Microsoft SQL Server, Snowflake, SAP HANA

Data Modeling: Star Schema, Snowflake Schema, Semantic Models

Programming: Python, PySpark

Governance: Row-Level Security (RLS), Enterprise Gateway, Scheduled Refresh

Tools: Alteryx Designer, Git, JIRA, Excel, Agile Scrum

EXPERIENCE

Systems Engineer

Jan 2023 – Present

Tata Consultancy Services Ltd

Hyderabad, India

- Designed and developed 20+ interactive Power BI dashboards and KPI reports using DAX, Power Query, drill-through, bookmarks, and custom visuals, improving reporting efficiency and enabling faster business insights.
- Collaborated with business stakeholders to analyze reporting requirements and deliver Power BI, SQL, and Microsoft Fabric solutions, reducing report development turnaround time by approximately 30%.
- Developed end-to-end ETL pipelines using Azure Data Factory, Alteryx Designer, and Microsoft Fabric to integrate data from SAP, SQL Server, Snowflake, Excel, and REST APIs, improving data availability and reducing manual data preparation by 40%.
- Implemented Microsoft Fabric solutions using OneLake, Lakehouse, Semantic Models, and Data Warehouse, enabling centralized analytics and improving report refresh performance.
- Designed Star Schema and Snowflake Schema data models, developed reusable DAX measures, and optimized SQL queries, reducing report execution time by approximately 35% while improving data accuracy.
- Automated data validation and reporting workflows using Python (Pandas) and PySpark, reducing manual effort by nearly 50% and improving data quality.
- Implemented Row-Level Security (RLS), Enterprise Gateway, scheduled refresh, deployment pipelines, and managed Power BI Service workspaces, ensuring secure reporting with over 99% successful scheduled refreshes and streamlined release management using Git and Agile methodologies.

Assistant System Engineer

Jan 2021 – Dec 2022

Tata Consultancy Services (Client: NatWest)

Hyderabad, India

- Developed interactive Power BI dashboards and business reports for Banking and Financial Services, enabling business users to monitor operational and financial KPIs.
- Created DAX measures, calculated columns, and Power Query transformations to support business reporting, improve data accuracy, and automate reporting processes.
- Assisted in developing ETL pipelines using Azure Data Factory (ADF) to extract, cleanse, and transform data from SQL Server, Excel, and enterprise source systems.
- Wrote SQL queries, views, joins, and stored procedures to support data extraction, validation, and reporting requirements while improving query performance.

- Supported dimensional data modeling by implementing Star Schema and Snowflake Schema structures to enhance reporting performance and data consistency.
- Published and maintained Power BI reports in Power BI Service by configuring workspaces, scheduled refreshes, Row-Level Security (RLS), and Enterprise Gateway while providing production support in Agile/Scrum environments.

SELECTED PROJECT

Enterprise Reporting & Microsoft Fabric Analytics Platform | *Banking & Financial Services*

- Developed an enterprise reporting platform using Power BI, Microsoft Fabric, Azure Data Factory, and SQL to consolidate data from SAP, SQL Server, Snowflake, Excel, and REST APIs into a centralized analytics solution.
- Designed scalable ETL pipelines and dimensional data models using Star Schema, enabling reliable data integration, transformation, and consistent KPI reporting across business functions.
- Built interactive executive dashboards with reusable DAX measures, Power Query transformations, drill-through navigation, and custom visuals to support operational and financial reporting.
- Implemented Microsoft Fabric capabilities including OneLake, Lakehouse, Semantic Models, and secure report deployment using Row-Level Security (RLS), Enterprise Gateway, and scheduled refresh to improve governance and reporting efficiency.

EDUCATION

Bachelor of Technology (B.Tech)

2016 - 2020

Sagi Rama Krishnam Raju Engineering College (SRKR)

CERTIFICATIONS / COURSES

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- SQL for Data Analytics
- SAFe 5 Agile Practitioner
